

Nodis Consulting – Energy Transition & Digital Professional

Your journey with us

- Work closely with energy and utility players to tackle the challenges of the energy transition
- Act as the bridge between business and IT, translating strategy into concrete and scalable solutions
- Deploy the power of disruptive technologies such as Artificial Intelligence, Internet of Things and Digital Twins to create real impact
- Use your analytical mindset to solve complex challenges such as balancing supply and demand, optimizing energy flows, or enabling new energy services
- Collaborate in multidisciplinary teams across business, technology, and energy expertise
- Build strong client relationships and deliver high-quality results with tangible impact
- Continuously grow your skills in consulting, stakeholder management, and latest digital technologies
- Contribute to cutting-edge projects such as:
 - Designing future energy markets and pan-European energy systems
 - Supporting OEMs and new entrants to access and operate in the energy landscape
 - Shaping innovative solutions around flexibility, electrification, and system integration

Let's talk about you

- Strong affinity with the energy or utilities sector; relevant experience is a plus
- Passion for the energy transition and the role of innovation in accelerating it
- Interest in and ideally experience with Artificial Intelligence, data, or digital technologies
- Analytical, proactive, and pragmatic mindset with a strong sense of ownership
- Strong communication skills and the ability to engage with diverse stakeholders
- Master's degree in a relevant field (e.g. engineering, economics, IT, or energy-related disciplines)
- Fluent in Dutch, with a good command of French and English
- Comfortable working independently as well as collaboratively in a structured way
- You're the colleague people are glad to have on their team. Straightforward, reliable, and good fun to work with. You care about doing things right and know that a strong team dynamic is half the job.

Why join us?

Real impact

Digital transformation projects that directly contribute to a sustainable and future-proof energy system

Energy transition focus

Be at the forefront of electrification, renewable energy integration, and the transformation of energy markets

Cutting-edge technology

Leverage and build expertise in AI, digital innovation, and emerging technologies to solve real-world energy challenges

Career growth

Clear career plan, coaching from experienced consultants, and a chance to grow with a fast growing company

Compensation

Market-conform salary, company car or mobility budget, 32 days off, profit sharing and training days

Culture

No-nonsense, open and collaborative — with a team that genuinely looks out for each other and knows how to have fun along the way
